# Safe Organic Pest & Disease Control

## MAJOR BREAKTHROUGH

Following years of research, two proven organic pesticides have been refined and reformulated resulting in a quantum leap in effectiveness. Both products **Certified Organic by Biogro®**, provide gardeners with the peace of mind that they can spray right up to harvest with complete safety. Add to this, safety to bees, beneficial insects and the environment, means **Grosafe Enspray 99** and **Grosafe Free Flo Copper** are an essential basis for pest and disease control in the garden.

**DECOR** GARDENWORLD

'Tauranga's Favourite Garden Stop'

## At a Glance

- Certified Organic by Biogro®
- Safe to bees, beneficial insects and the environment
- NIL withholding period on food crops - can be used at any stage including during harvest
- The **perfect pair** for home garden pest and disease control
- They are complimentary and work well together
- **A REALLY EFFECTIVE ORGANIC REMEDY**

## GROSAFE ENSPRAY 99

Control sucking insects on all fruit, vegetables and ornamentals with Grosafe Enspray 99.

### What is Grosafe Enspray 99?

**Enspray 99** is a new generation mineral oil spray. Mineral oil has been used as an insecticide for several generations because of its low toxicity. A significant problem has always been the plant coverage, stickability and the tendency to burn young or tender foliage. This is due to impurities in the oil.

**Enspray 99** is the result of years of research to refine the paraffinic oil to a pure form, extracting all the impurities and then formulating with safe, highly effective organic surfactants and emulsifiers. **The result is a mineral oil spray like no other.** It gives better coverage, spread and stickability, resulting in vastly improved insect control, with no burning of tender foliage.

**Enspray 99** is so good it also acts as a fungicide giving very good control of powdery mildew.

Enspray 99 is also highly effective as a spreader sticker and greatly enhances the performance of other insecticides / fungicides.

### What Pests are Controlled?

Aphids, white fly, thrips, mealy bug, scale, mites, psyllids.

### What Crops can it be Used On?

**Enspray 99** is approved for use on all fruits, vegetables and ornamentals.

### Certified Organic

Approved and certified organic by Biogro®. Nil withholding period means you can spray right up to and during harvest.

## GROSAFE FREE FLO COPPER

Control fungus diseases on all fruit, vegetables and ornamentals with Grosafe Free Flo Copper

### What is Grosafe Free Flo Copper?

**Free Flo Copper** is a new generation copper spray. Copper oxychloride has been used as a fungicide for generations. 25 years ago brought the development of an improved form - copper hydroxide.

**Grosafe Free Flo Copper** is a step up again to a very high quality copper hydroxide - developed for the control of the difficult Kiwifruit disease, PSA. This advance is now available to home gardeners.

**Free Flo Copper** is formulated as a fine water dispersible granule which pours freely from the bottle and measures the same as water (5g = 5 mls). It has finer particles which spread and adhere to the leaf surface better than other coppers.

**Free Flo Copper** is approved for control of more

diseases on more crops than copper oxychloride or liquid coppers.

Unlike some coppers, **Free Flo Copper** is compatible with all pesticides and is particularly good when used in conjunction with **Enspray 99**.

### What Diseases are Controlled?

Anthracnose, alternaria, bacterial blight / spots, black spot, bladder plum, downy mildew, early and late blight, fire blight, leaf curl, leaf spot, shot hole, verrucosis.

### What Crops can it be Used On?

**Free Flo Copper** is approved for use on all fruits, vegetables and ornamentals.

### Certified Organic

Approved and certified organic by Biogro®. Nil withholding period means you can spray right up to and during harvest.

### FOR VEGETABLES:

**Free Flo Copper** controls blights, leaf spots, downy mildew, bacterial spots / blights.

**Enspray 99** controls aphids, white fly, thrips, mites, psyllids and powdery mildew.

This combination will keep the veg garden healthy. Occasionally it will be necessary to add another insecticide such as Mavrik or Success Ultra for caterpillars. The presence of Enspray 99 will assist these products to give a better result.

### FOR FRUITS:

**Free Flo Copper** controls anthracnose, alternaria, bacterial spots (psa), black spot, bladder plum, downy mildew, fire blight, leaf curl, leaf spot, shot hole, sooty mould and verrucosis.

**Enspray 99** controls aphids, white fly, thrips, mealy bug, scale, mites, psyllids and powdery mildew. This
